Arista Laboratories is pleased to announce that Sherry Duff has joined as the President and Managing Director overseeing all operations in Richmond, Virginia and Kingston upon Thames, England. Previously, Sherry was the Director of Strategic Planning and Government Affairs for Arch Chemicals, a \$1.5 billion specialty chemical company, headquartered in Norwalk, Connecticut (USA). Sherry brings more than twenty years of business and regulatory experience in the chemical industry and is well prepared to guide Arista to new opportunities serving both the tobacco industry and other new markets.

As a first order of business under Sherry's direction, Arista Laboratories is excited to announce an expansion of its facilities and services for 2012. A two phase expansion of laboratory space and resources is currently underway in Richmond, Virginia. Phase one is an expansion of our current laboratory to increase testing capacity. This new lab space will be fully functional and validated in early 2012.

Phase two involves a physical relocation of the laboratory to a new 50,000 sq/ft facility on the north side of Richmond. This new, state-of-the-art facility will significantly improve Arista's ability to meet the changing needs of our current client base, and position the company for growth into new markets.

In addition, Arista Laboratories has completed the development and validation of the chemical assays needed to perform testing as listed in the current FDA draft HPHC list. All new methods have been added to Arista Laboratories ISO 17025 Scope of Accreditation.

Arista Laboratories is a wholly owned subsidiary of Molins PLC and is dedicated to providing high quality, independent third-party analysis to the tobacco industry.
